## Decimals of the Week

and $\qquad$

Monday: a) Represent each decimal on a Place Value Chart.
b) Write each decimal in word form.
| c) Write each decimal in expanded form.

Tuesday: Find the:
a) sum of the two decimals.
b) difference between the two decimals.

Use estimation to determine if your answers are reasonable.

Wednesday: a) Compare the two decimals using >, =, and < symbols. Use a visual model to justify your thinking.
b) Show different ways that you might round this decimal (e.g. to the nearest tenth, hundredth, whole number).

Thursday: a) Multiply each decimal by 10, 100, 1,000, 10,000.
b) Divide each decimal by 10, 100, 1,000, 10,000.

Friday: Write and solve three word problems using the two decimals. Use a different operation for each problem. Use estimation to show that your answers are reasonable.
